

# With Axess on the top

**From now on, the new Jennerbahn will take everyone up to 1,800 meters all day and relies on Axess not only for access management.**

With a total investment volume of 47 million euros, the construction of the Jennerbahn is currently one of the most important cable car projects in Germany. The Jenner impresses not only with the mountain station at the summit including a breathtaking view, but also with a circular hiking trail and the perfect photo backdrop for the whole family. From leisurely hut hikes to summit and multi-day tours - there is something for everyone. After a two-year construction period, it shines in new splendour since July 2019 and cannot be compared with its predecessor from 1953. The 10-passenger gondola lift is particularly impressive with its almost silent and comfortable operation,

which brings mountain climbers, summer visitors and skiers to their destination.

To make sure that the Jenner remains an attractive destination for everyone, accessibility in all areas is a top priority. This is also reflected in the ticketing and access management system used, as the latest solutions from Axess RESORT SOLUTIONS were used here. For example, the AX500 Smart Gate NG access points were equipped with the latest scanners and barrier-free entrances to allow fast and easy access to the gondolas. The products are all manufactured in our own plant in Innsbruck. The same applies to RFID tickets for season tickets or daily

and weekly ski passes, as well as barcode tickets for mountain/valley rides in summer.

To make sure that hiking sticks, skis and co. are safely stowed away after the sporting activity, the Jennerbahn relies on the

solutions of Axess Locker Management (lockers for sports equipment) and on the various versions of Axess Smart Cards. Thanks to these smart solution, visitors can book a personal locker when buying tickets. This saves time and nerves!

The ticket purchase can also be completed without waiting times: the Axess WEB SHOP in combination with the Axess PICK UP BOX 600 offers an elegant solution to get to a ticket quickly and easily. Whether by voucher or QR code on a smartphone, the ticket is in the hands of the visitor in 0. 2 seconds. This elegant solution is very popular with visitors from all over the world, leaving more time for the important things.
