Axess
COVID CERTIFICATE CHECK
Entry only with EUDCC

Whether it's the next wave or new mutations, the coming winter season brings some uncertainty for cableway operators. The conditions affecting ski operation can change up to the last second. The Axess COVID CERTIFICATE CHECK system ensures that the ski season is operated in accordance with the law.

Digital Check of Health Certificate

The Axess solution guarantees that only guests with a valid ticket and a valid EU Digital COVID Certificate (EUDCC) can pass through the gates.

The actual ticket sales process remains unchanged. This means that cable car operators/resorts can sell tickets to their guests using all the usual sales channels. The only difference is that tickets are issued in an inactive state. They must then be activated by guests with their EU Digital COVID Certificate (EUDCC). After that, they can be used at the gate. This activation process takes place in a self-service procedure at the POA „Point of Activation". The Axess **SMART SCANNER 600** serves as such a checkpoint. Guests scan their ticket and afterwards the QR code of their EUDCC. The ticket is activated by a valid certificate.

Configuration options allow rules to be defined and adapted to changes during the season, e.g. period of validity, etc.

Activation via the Activation Portal allows guests to conveniently activate their ticket online. Guests enter the ticket/sales number and upload the EUDCC QR code for verification. The system then activates the ticket according to the defined set of rules. Handheld devices such as Axess **HANDHELDS** can serve as additional and flexible „points of activation". Of course, the ski ticket can also be purchased and activated at the cash register.

The EUDCC is scanned by the cashier and the ticket is activated. Alternatively, the cashier can visually check the EUDCC and then activate the ticket manually at the POS.
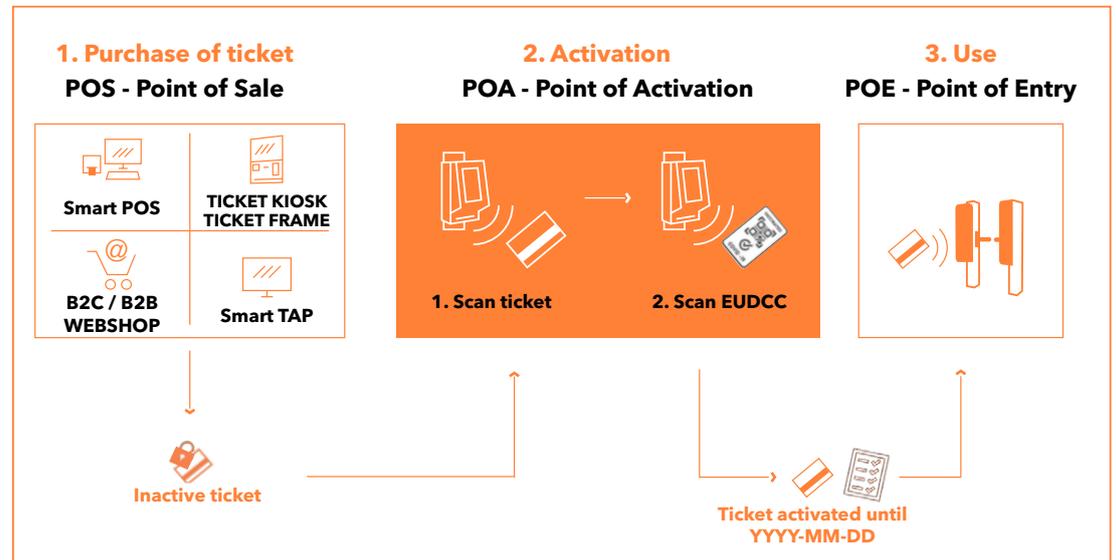

Overview of Activation Possibilities

Employee Activation:

SMART POS

HANDHELD

Self-service Activation:

MODULE CHASSIS SINGLE DESKTOP

SMART DOOR 600

Activation Portal

PICK UP BOX 600

SMART POST 600

Tickets can be activated by employees on site or by self-service. In this case, ski guests can either activate their tickets at home via the Activation Portal of the ski resort or at the activation points on site.

The ticket purchase process remains unchanged for the guest and is possible at all points of sale. The only condition for access is the activation.

Activation Process

By scanning the QR code of the EUDCC on the **SMART SCANNER 600**, this intermediate step is carried out regardless of the location of the gate and avoids lines before accessing the lift.

1. Purchase of ticket
POS - Point of Sale

Smart POS
