Axess COVID CERTIFICATE CHECK

Access only with EUDCC proof

Whether it's the next wave or a new mutation, the conditions for ski resorts can change again and again. The Axess **COVID CERTIFICATE CHECK** digitally verifies COVID certificates to ensure ski resorts operate in compliance with legal regulations.

The Axess solution guarantees that only guests with a valid ticket and a valid EU Digital COVID Certificate (EUDCC) can pass through the gates.

The ticket sales process remains unchanged. This means that cable car operators and ski resorts can sell

tickets to visitors using all their regular sales channels. The only difference is that tickets are inactive when issued. Once the guest presents their EU Digital COVID Certificate (EUDCC), the ticket is activated and can then be used at the gate. Tickets can be activated in a self-service procedure at the POA (Point of Activation), with the Axess **SMART SCANNER 600** serving as a checkpoint. Guests scan their tickets and the QR code in their EUDCC, and their valid certificate activates their ticket. Configuration options allow operators to define rules and adapt to changes throughout the season, for

example, changes in validity periods, etc. The online activation portal allows guests to conveniently activate their ticket online. Guests enter their ticket number and upload their EUDCC QR code for validation. The system then activates the ticket according to the defined rules. Handheld devices such as Axess **HANDHELDS** can also serve as additional, flexible POAs. Lift tickets can also be bought and activated at the counter. The cashier scans the customer's EUDCC which activates the ticket. Or, the cashier visually checks the EUDCC and then activates the ticket manually at the POS (Point of Sale).

SMART SCANNER 600**
Activates ticket at POA
(Point of Activation).

In short

- › Ticket is only activated with a valid EUDCC
- › Manual activation options:
 - Axess HANDHELD
 - Axess POS
- › Self-service activation:
 - Axess SMART SCANNER 600
 - Activate online via the Axess activation portal

Activation options

Tickets can be activated by employees on-site or by customers via self-service options. Customers can activate their ticket at home via the ski resort's activation portal, or at activation points on-site.

Activation process

The ticket purchase procedure remains unchanged for customers, and is possible at all points of sale. Tickets must simply be activated to gain access. By scanning the EUDCC's QR code at the **SMART SCANNER 600**, tickets can be activated regardless of where the gate is located, and this helps to avoid long lines.

Online activation by customer

Customers can activate their ticket by entering the ticket ID and then uploading their EUDCC.
