**AXESS**

**Hello!**  
**We are**  
**Axess.**

# Axess AG

## Innovative technology for a better trade fair experience

Axess is a leader in ticketing and access solutions for trade fairs and convention centers. Since 2002, Axess has been active in the trade fair market and currently more than 30 exhibition centers around the world have installed Axess systems. All of these systems use the latest technologies and comprehensive solutions. In recent years, this Austrian company has developed into a full-service provider for visitor management at trade fair and convention centers. Starting with on-line registration at home or on site, to

entry to the exhibition halls, through to lead tracking. With systems by Axess operators get complete solutions. Axess is headquartered in Anif/Salzburg, Austria, home to the company's sales, marketing, finance, and hardware and software development departments. Customer projects are turned into reality thanks to our project management, and support takes place not only from the Salzburg headquarters, but around the globe. All customers are taken care of on site and in their own language. All hardware and software

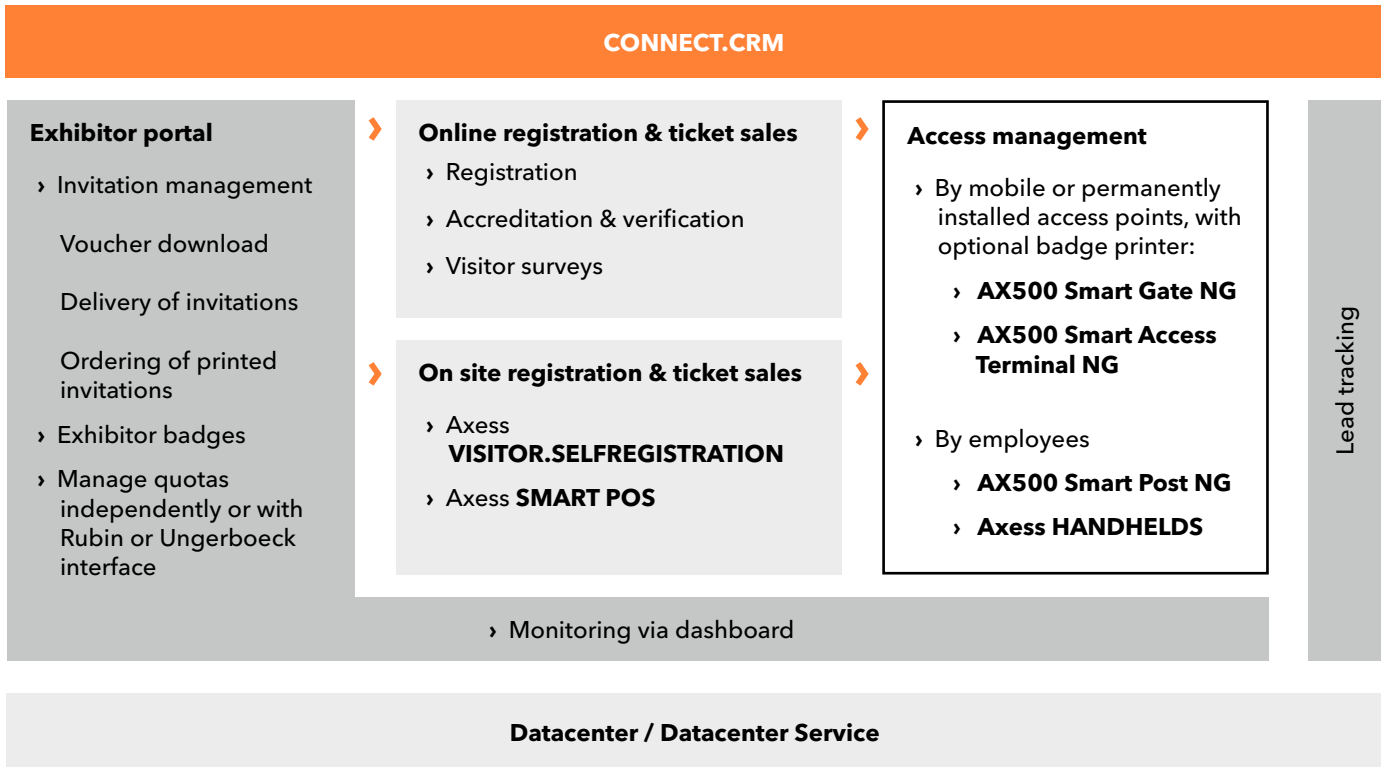

products, as well as Axess Smart Cards and Tickets for the various business areas, are produced in the Axess factory in Innsbruck (Tyrol). Company values are based on partnership with our customers and on the individuality of the systems and products. This lays the foundation for global success and high customer satisfaction. Every day, our more than 300 employees are on duty in over 53 countries. Axess AG was founded in 1998 and has 20 subsidiaries worldwide.

# Axess VISITOR PLATFORM

## Smart solutions for online ticket sales

The Axess **VISITOR PLATFORM** offers exhibition centers the perfect opportunity to improve visitor data quality, reduce wait times at the point of sale, provide registration information or carry out visitor surveys. Rates, GUIs and sales processes can be customized for each event. That's why more and more visitors are purchasing their tickets conveniently online. Together with the Axess **VISITOR.TICKETSHOP**,

the **VISITOR PLATFORM** offers a modern, web-based solution for on-line registration and ticket purchases. The interface of the ticket shop assists visitors with clear, easy-to-follow steps on how to use the shop and purchase tickets. Axess already offers a wide variety of integrated payment service providers for payment transactions. Professional visitors and members of the press can submit a verification re-

quest to be approved by the trade fair services over the administration interface. The user can create an account in which their verification and sales history can be called up at any time. With Axess **VISITOR.SELFREGISTRATION**, visitors can enter their own data on site. Visitor surveys can also be integrated into the registration process.

# Axess VISITOR.SELFREGISTRATION

## On site registration

On site registration is as easy as pie when you have the option to register yourself. Axess **VISITOR.SELFREGISTRATION**, along with the Axess **VISITOR.TICKETSHOP**, is part of the Axess **VISITOR PLATFORM**. With central and web-based administration and configuration, the web-based kiosk solu-

tion allows for vouchers to be quickly redeemed and visitors to be registered using an intuitive interface. A clear separation of registration and payment expedites the registration process while increasing data quality. Google Places API and Google Company Search are used to assist visitors here. Visitor sur-

veys can also be conducted using the registration terminals. If no free guest invitation is used, the registered ticket can alternatively be paid for directly at the cash desk on site. The information required for registration can be defined separately for each event and can be accessed live at any time.

# Axess SMART POS

## The powerful point of sale system

This cash register solution impresses with a powerful system that allows both online and offline purchase of tickets. Axess **SMART POS** can be individually configured and is excellently suited to both public fairs and professional trade shows. A touch-screen allows for easy, intuitive use of the system. With the business card scanner, visitor information can be automatically digitized during regis-

tration at the POS and subsequently printed on a badge. Quick ticket issuing capabilities and flexible payment options allow for efficient transactions. The easy-to-read customer display gives visitors an overview of prices and other information. With the camera, photos can be taken for personalized tickets. The receipt printer can even print tickets with barcodes.

### In short

- › Online and offline operation (local database)
- › Fast ticket production with up to four printers
- › Visitor registration via business card scanner
- › Clearing functionality
- › Company and visitor search function
- › Clearly structured ticket selection
- › Individual positioning of keys
- › Select color and rates by event
- › Selection of icons
- › Several key levels (events, tickets, items, packages etc.)

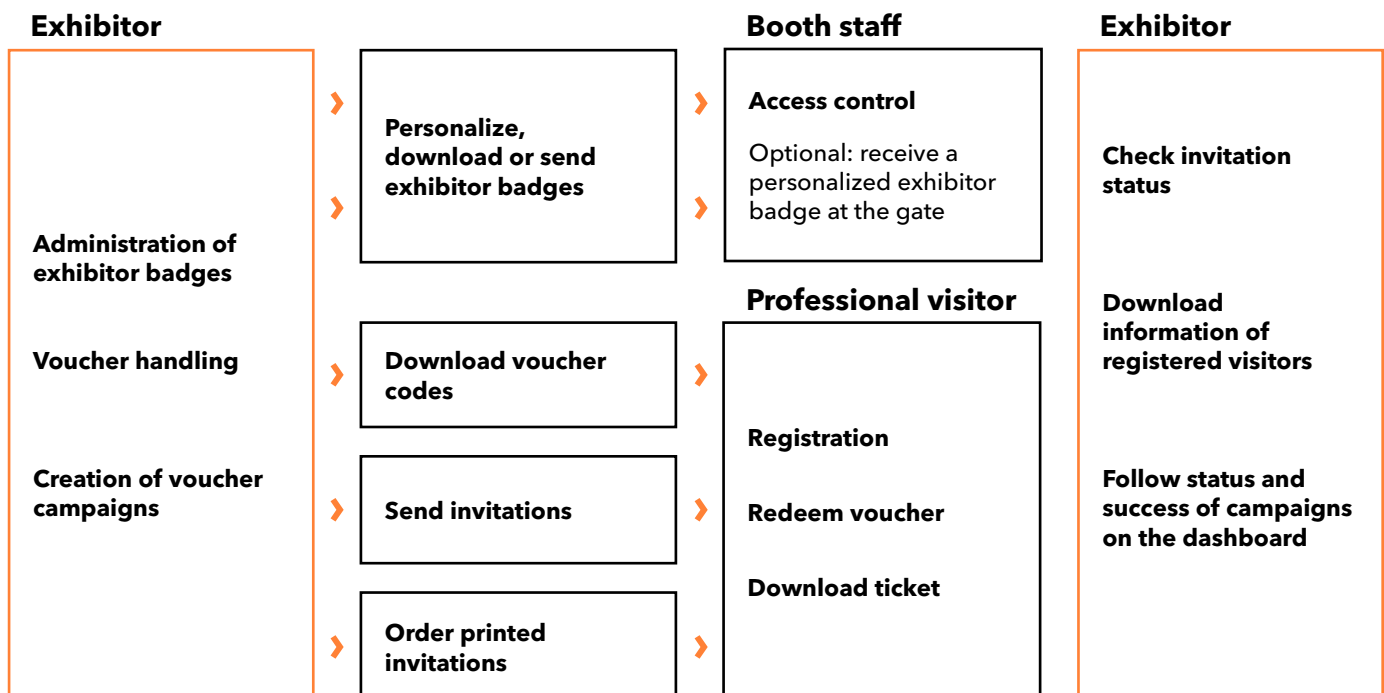

# Axess EXHIBITOR PLATFORM

## More than invitation management

The Axess **EXHIBITOR PLATFORM** allows exhibitors to easily manage visitor invitations and exhibitor passes. Corresponding voucher codes are available for download, and printed invitations can also be ordered. Customer data needed for invitations can be imported and customized invitations can then be

sent by e-mail. The status of all vouchers and invitations can be checked live, anytime, allowing the exhibitor to stay up-to-date on the success of their campaign, and whether a visitor has already registered or has arrived at the event venue. The exhibitor can also export a visitor's CRM-relevant infor-

mation. The **EXHIBITOR PLATFORM** of course allows booth staff to easily be registered, and exhibitor badges can be downloaded and sent. Interfaces to standard booth booking solutions allow automated comparison of exhibitor information and their quotas.

# Axess LEADS

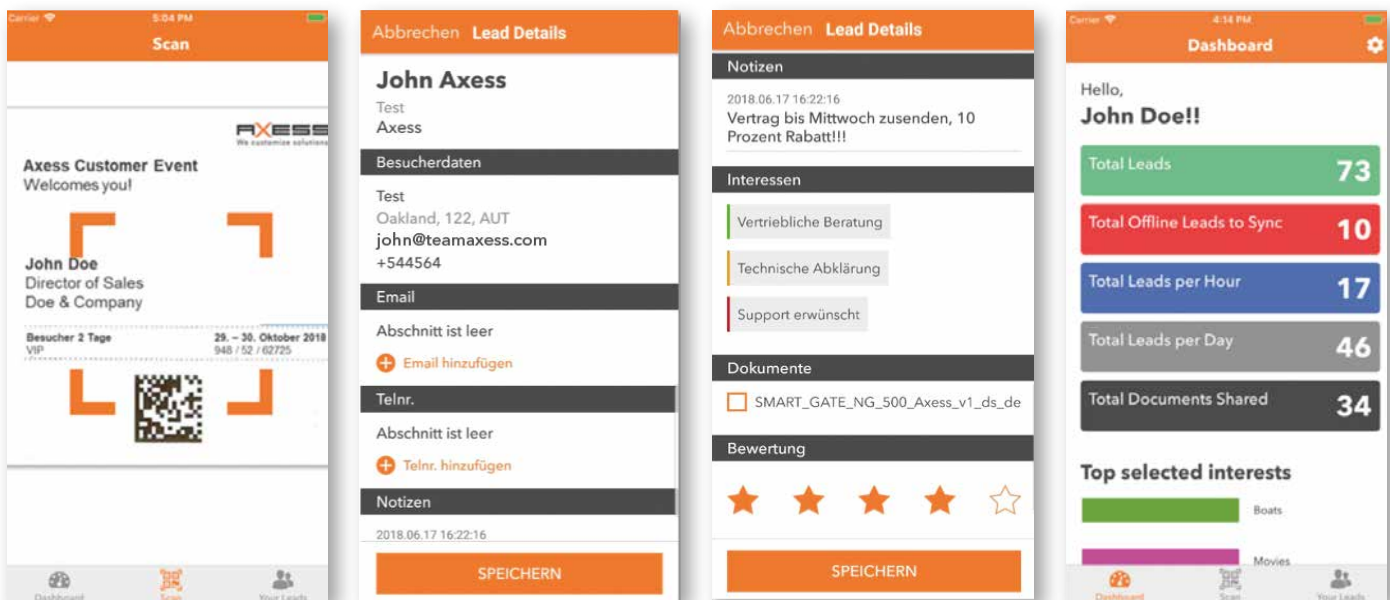

## Innovative lead tracking for fairs and conventions

Axess **LEADS** allows live data to be easily collected from booth visitors via the app or the Axess **LEADS** portal. Replacing the tedious work of recording business cards, visitor tickets are scanned and the recorded data is sim-

ply downloaded via the **LEADS** portal, allowing you to see how the event is frequented online while it is still taking place. The team at the booth can use the app to add to the visitor's profile, poll interests, save notes or

send documents directly to the visitor. Alternatively, the **LEADS** "Quick Scan Function" can simply be activated if exhibitors need to quickly record visitors to the booth.

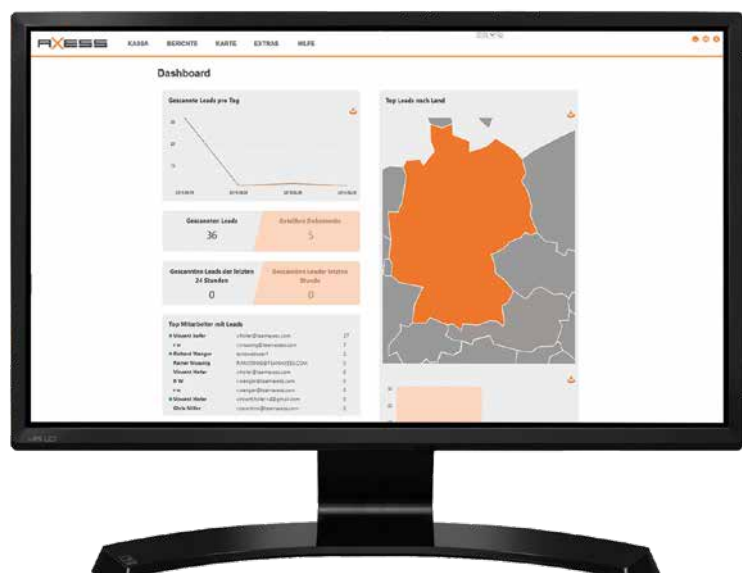

## Scan the visitor badge's QR Code using the Axess LEADS App or Axess LEADS Portal.

### In short

#### Real-time overview of collected contacts

- > Dashboard
- > Analyze leads collected
- > Download leads via Excel and CSV export

# Axess SMART GATES

## Access systems with customizable options

The **AX500 Smart Gate NG** was developed to master the challenges of an event right from the initial point of entry. Its modular design makes it the perfect solution for unique requirements and allows individual components to subsequently be changed or updated. In addition to permanently

installed access points, Axess offers mobile solutions that can be mounted onto pallets and operated via battery and Wi-Fi modules, among other options, independently of a network and power connection. Axess gates give you high flexibility and improve visitor experience at the venue.

### In short

- › Equipped with the Axess **SMART SCANNER 600**
- › Modular design
- › 360° light signal
- › Permanently installed or mobile
- › Optional battery pack
- › Optional Wi-Fi module

# AX500 Smart Access Terminal NG

## Perfect for trade fair and convention centers

The **AX500 Smart Access Terminal NG** is the ideal access solution for trade fair and convention centers. The system can be equipped with a turnstile on one or both sides, thus creating two points of access at a single gate.

The speed at which the turnstile opens can be customized. Both check-in and check-out is possible at the same gate. Plus, every gate can be additionally equipped with ADA modules for wider access.

### In short

- › Possible to enter and exit at one gate
- › 2-arm turnstile design eases access when carrying bags or luggage
- › Optional - ADA entry for accessible access
- › Optional: emergency exit mode with Panic Mechanic

**Optional features**  
Panic Mechanic or ADA entry

# Die Axxess pallets

## Flexible and movable access points

The **AX500 Smart Gate NG** can be mounted quickly and easily on Axxess pallets. Pre-stipulated installation positions ensure the correct distances and angles are observed. The access point is usually factory-installed on the pallet and must therefore only be positioned and configured on site. The

integrated cable ducts easily hide all cords and cables. Simply screw pallets together to create multiple access options. These stainless steel pallets are particularly durable, and the bottom of the pallets features a non-slip surface and offers the perfect design.

### In short

- › Quick assembly on site
- › Fully assembled gate upon delivery
- › Flexible positioning thanks to Wi-Fi and battery pack
- › For use both indoors and outdoors
- › Weatherproof
- › Can be installed in multiple rows
- › Internal cable duct
- › Optional: ADA module for barrier-free access

#### Mobile stand with wheels

The flexible solution for **AX500 Smart Post NG** and Axxess **SMART POST 600**

#### Mobile pallet

This versatile pallet can be used in all areas

#### Mobile pallet with wheels

Especially flexible and easy to move thanks to wheels, this pallet is perfect for situations that require high mobility

# A variety of optional barriers

## Turnstile

The durable Axess **Turnstile module** acts as a modern barrier for both indoor and outdoor access points. A light sensor detects an approaching person to allow for contactless passing through. The two-armed design prevents visitors from getting trapped

and provides greater convenience. Arms rotate in both directions to allow both entry and exit. In models with Panic Mechanic, the arms drop automatically to clear the way in the event of a loss of power or an alarm.

### In short

- › Contactless entry
- › Customized opening and closing speed
- › Acts as a barrier when closed
- › Use in both directions - entry and exit at one gate
- › Can be used as an emergency exit

## Flap, Flap Glass and Flap Paddle

Short opening and closing times characterize the **Axess Flap**. Thanks to intelligent sensors, it can distinguish between people and objects such as

strollers or suitcases. The **Axess Flap Glass** with glass doors is the elegant version for indoor areas. The Axess **Flap Paddle** makes an entrance par-

ticularly secure as it prevents people from ducking under the **Flap Paddle**. Optional extra wide arms (ADA) ensure barrier-free entry for all modules.

# Axess BADGE BOX 600

## A badge printer directly at the access point

A smart update to the **AX500 Smart Gate NG** allows badges to be printed right at the access gate. Using a pre-purchased online ticket, a professional visitor badge can be printed right at the entry to the event, allowing professional visitors, members of the press and VIPs fast access to fairs and conventions. Long waits at the cash desks and registration points are a thing of the past. The registered visitor

scans their ticket from their wallet, smartphone or print@home ticket and receives their badge. Once their badge has been issued, they are granted access. The printed badge can be customized for each event and includes all information about the pre-registered visitor. Information on access areas can also be printed on badges for visual inspection.

### In short

- › Prints badge in seconds
- › Up to 1,000 badges per roll
- › Viewing panel on the rear to check fill level
- › Status information via an illuminated output slot
- › Badges of various lengths, up to 4" wide
- › Use of butterfly badges

**Axess  
BADGE BOX 600**

**Badge**  
Flexible design  
Professional visitor badge

# Axess SMART SCANNER 600 NFC

## Turn a smartphone into a ticket

The **Axess SMART SCANNER 600 NFC** is the latest access point module and turns a visitor's smartphone into a ticket. In addition to its existing features, our popular scanner now has an added NFC antenna. In addition to classic data carriers such as chipcards, transponder bracelets, QR codes on print@home tickets or wallets, NFC-capable devices can now also be used - meaning your smartphone becomes your ticket. Tickets can be purchased from the ticket shop and added to the smartphone wallet. The

visitor opens their ticket quickly and easily in the app with Google Pay or Apple Pay. Simply hold it briefly near the NFC antenna and the visitor then gains access as soon as the integrated Axess **CONTROLLER 600** has checked the ticket. The module can optionally be equipped with innovative IN/OUT sensors for detecting the direction of traffic. The Check-IN/Check-OUT procedure is made possible with a **SMART SCANNER 600** and the direction can be switched from entry to exit in a matter of seconds.

### In short

- › Scans 1D and 2D barcodes, print@home tickets and vouchers
- › Fold-out reading surface for scanning electronic tickets
- › Integrated speaker for audio feedback
- › Modular design for fast installation and set-up
- › Optional: short-range reader for RFID/NFC devices and bracelet transponders
- › Optional: in & out sensors for two-directional use

#### Optical light signal

For fast access authorization checks

#### Housing

To make it easier to retrofit the scanner for existing systems or integrate it into third-party systems. Wall-mounted housing is also possible.

#### Large 7" LC touch display

Enables direct communication of instructions, hazard alerts, personal greetings or advertising messages at the gate

#### Swivel tray

Guarantees the perfect distance for faster reading of access authorization

# Axess HANDHELDS

## Mobile access control for every area

The handy Axess **HANDHELDS** are not only particularly durable and weather-proof, they also feature a high-quality touchscreen with a daylight-capable color display, allowing for comfortable work. Thanks to its intuitive operation, there is no need for extensive staff training. Automatic updates are

installed directly onto the device via Wi-Fi. The lightweight **HANDHELDS** can be used effortlessly all day long. In addition to Wi-Fi, LTE versions are also available. The **HANDHELDS** can also be used as a ticket inspector or ticket reader, and an optional pistol grip provides added comfort.

### In short

- › Intuitive operation
- › No costly training needed
- › Solid, weatherproof design
- › Touchscreen suitable for daytime use
- › Automatic sync

#### Housing

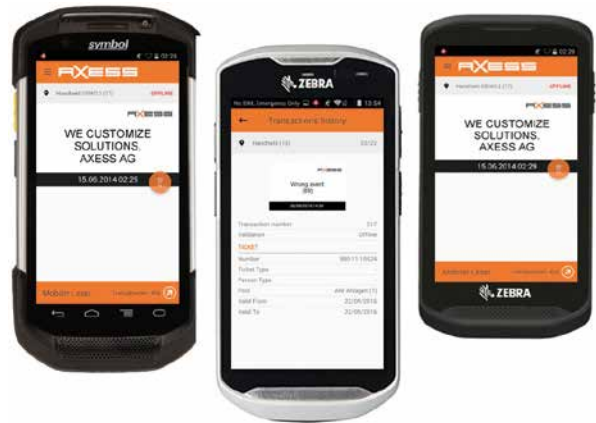

Light, solid and weatherproof design for unrestricted use outdoors

#### Color display with touch function

High-resolution color display for optimal operation in daylight

#### Operation

Intuitive smartphone-style touchscreen

# Axess PARKING

## Integration of parking space management

Parking management is fully integrated into the access solution for a trade fair or convention center, and can be operated from a central point. This allows, for example, exhibitor badges and visitor tickets to be combined with parking permits. Outside of event times, parking spaces can be made available for unrestricted use or rented as long-term parking spots. Entry to a parking lot or garage needs to be done quickly. Our parking management solution wins over customers with its fast ticket issuing and quick

opening in just 1.3 seconds. The sturdy, weatherproof gate is suited for use both indoors and outdoors. A single roll enables 2,500 barcode tickets to be printed, keeping wait times at a minimum. Regular and long-term parking customers can enter even more easily with RFID cards or license plate recognition. With these two options, the user or vehicle receives an account onto which entries and exits to the parking area are registered. Barriers then open automatically.

### In short

- › Read and check 1D and 2D barcodes and RFID Smart Cards
- › Brake-optimized gate
- › Online and offline modes
- › Call button with intercom
- › Visual display screen
- › Optional: license plate recognition and credit card function

# Axess TICKET KIOSK 600

## The genius among ticket machines

Multifunctional and interactive: the Axess **TICKET KIOSK 600** combines smart technology and user-friendliness, thus creating a new class of ticket machine. It enables quick, convenient parking and event tickets sales around the clock, and relieves checkout staff at

peak times. The Axess **TICKET SCANNER 600** reads barcodes, RFID and print@home tickets as well as QR codes on smartphones, giving visitors a fast, practical self-service option. The 27" color display with touch function provides a good overview of information.

The **TICKET KIOSK 600** also offers a wide variety of payment options and allows parking to be validated using an event ticket. It has a credit card function with country-specific terminal and is equipped for the use of NFC solutions.

### High-resolution 27" touchscreen display

Intuitive menu navigation and ADA mode with adaptive screen and service menu for maintenance

### Axess TICKET SCANNER 600

Reads RFID tickets in accordance with ISO 14443 or 15693, as well as barcodes and QR codes from mobile devices

### In short

- › Touchscreen
- › For indoor and outdoor use
- › Parking and event ticket issuing
- › NFC payment capabilities
- › Banknote reader
- › Optional coin module
- › Optional banknote return function

# Axess CLICS

## The entire system is managed centrally

Axess **CLICS** is the central interface and basis for all configurations, from access to cash registers and reporting. In simple steps, the visitor management system can be individually adapted to meet the requirements of any event using **CLICS**. Whether defining user authorizations or managing different sales channels and their rate structures, these and many other settings can be defined easily with **CLICS** thanks to its intuitive operation. Every user can adjust their **CLICS Dashboard** to meet their own requirements.

All relevant features and data are displayed directly after signing in. An extensive selection of widgets is also available. Reports are integrated in **CLICS** and can be retrieved at any time or automatically sent depending on your requirements. Pre-defined or customized reports can be regularly sent at certain times via a planner. The Axess **INSIGHT.APP** delivers required data to a smartphone in real time. This means that relevant key figures can be called up anywhere, anytime.

### In short

- › Browser-based software
- › Intuitive operation
- › Individualized configuration
- › Multi-client enabled
- › High security with encryption
- › Flexible control of sales channels

#### Dashboard

Easily changeable to meet individual requirements

#### Security

Highly secure with the latest encryption

#### Rights and roles management

Problem-free setting of user authorizations

#### INSIDE.APP

Visitors, sales and ticket sales of all sales channels

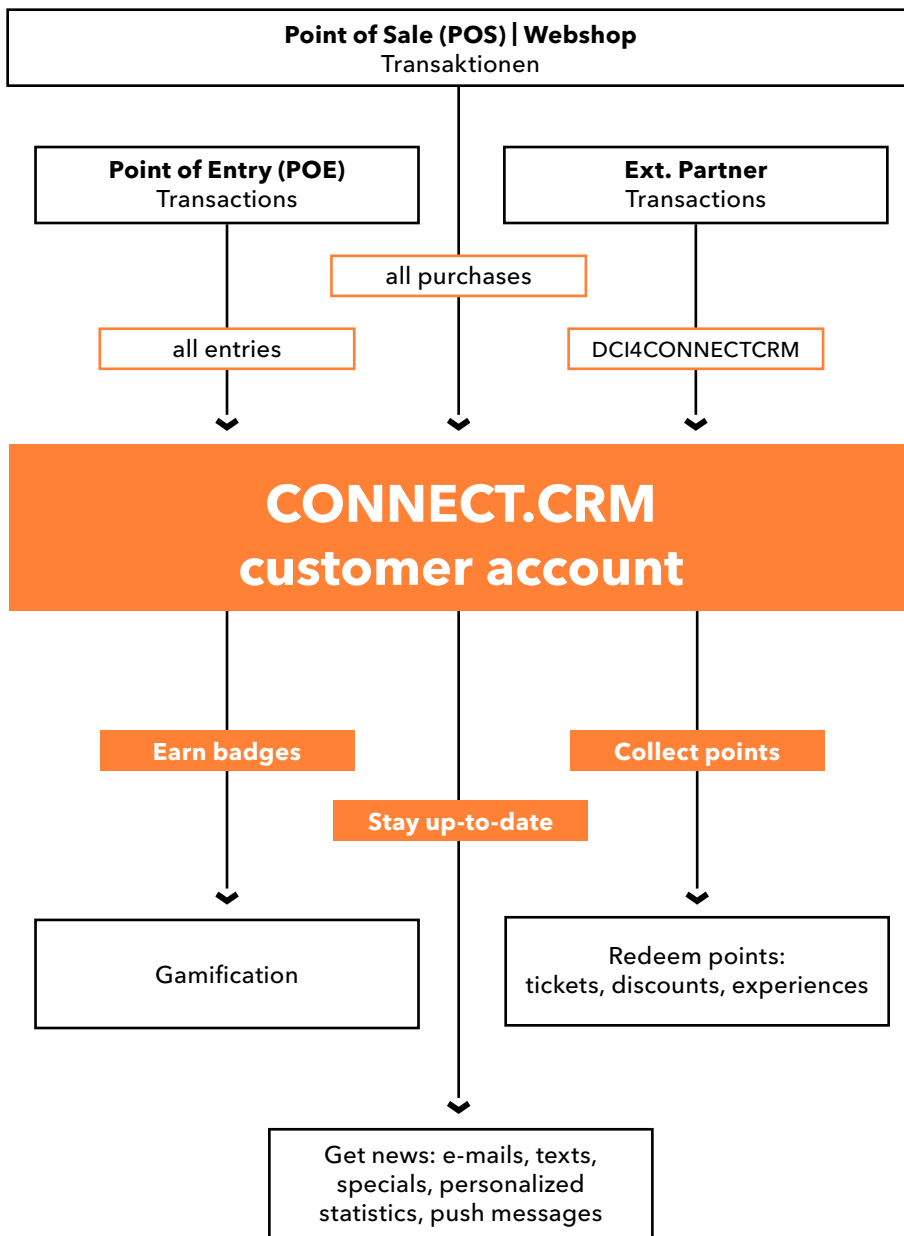

# Axess **CONNECT.CRM**

## Tailored communication with visitors

Axess **CONNECT.CRM** makes systematic structuring of customer relationships possible and helps to improve interaction with visitors. **CONNECT.CRM** enables all access and purchase transactions to be assigned to a visitor account. Data is recorded centrally in the Axess **DATACENTER**. Here, a visitor's personal data is managed in a

customer account and can be used for marketing activities. Exhibition organizers get to know their visitors' needs even better and are able to tailor communication to their target audience. Event visits, buying behavior and specific personal data are monitored over various channels. After reporting, news can be sent directly to guests via text

message or e-mail with the integrated newsletter tool. In addition to newsletter marketing, Axess **CONNECT.CRM** offers customer retention with gamification. A level-based success system is used to promote loyalty and interaction with visitors.

### In short

- › Create personalized offers and targeted communication via e-mail, texts and push messages
- › Incorporate partners for extended data collection and increased customer value
- › Define individual rules for collecting and redeeming bonus points and rewards
- › Connect accounts to families/groups
- › Structured collection and analysis of customer data in compliance with GDPR
- › Evaluations and statistics at a glance

# Axess DATACENTER

## Smart data management – secure and efficient

The Axess **DATACENTER** is the heart of all Axess systems. All components are connected to the **DATACENTER** online. It manages and communicates with clients – the terminal devices

in the system. The centrally collected data is used to create individual invoices and reports with just a few clicks of the mouse. The **DATACENTER** also forms the basis for the Axess

**WEBSHOP** and Axess **CONNECT.CRM** solutions. It features the highest security standards. Choose from two options to get the best system for your needs.

The Axess **DATACENTER SERVICE** offers first-class support without an on site server. As an application service provider (ASP), the entire operation is handled by Axess. The server does not need to be supervised, and you don't have to worry about a backup. The database is hosted by Axess and the servers are constantly checked for availability. Plus, the hardware is continuously maintained to keep the systems up-to-date. The data center has the highest security standards (ISO 27001) and the latest premium hardware. This means that you can deal with day-to-day business on site while the Axess team takes care of the **DATACENTER SERVICE**.

### DATACENTER SERVICE

Service packages

- › **DCS Basic / Medium / Large:**  
Up to 50 clients; complete DATACENTER environment for e-commerce; updates; software licenses
- › **DCS Enterprise:**  
All DCS Basic services for an unlimited number of clients; georedundant; external expert support for design, patches and emergencies
- › **DCS Enterprise Premium:**  
All DCS Enterprise services plus database cluster in a dedicated environment; high-performance e-commerce applications; greatest reliability; individual maintenance window

### In short

- › Low investment costs
- › No IT and database administration required
- › High availability through clustered server and database landscape
- › Automatic data backup
- › Axess handles maintenance and service of components
- › Automated supervision of systems and databases
- › Emergency power supply
- › Internet connection redundant
- › Georedundant data centers

### LOCAL DATACENTER (On-Premise)

You also have the option to install a local server on site. Clients have two options:

#### ➔ Axess **DATACENTER SERVER**

Clients have the option to integrate a server into their local infrastructure. This solution is especially popular with clients who have their own IT department on site. However, Axess can also take over supervision and maintenance.

#### ➔ Axess **APPLIANCE**

With this option, an active/passive or active/active cluster is installed. Two servers work together and take over or share the work. This guarantees fail-safe operation even if a problem occurs.

### In short

- › Does not rely on internet connection
- › Tailor-made solution on premium hardware
- › Maintenance, servicing and monitoring can be done by Axess
- › Embedded into local infrastructure

# Axess Service

## Focused on being by your side

Als Kunde sind Sie unser Partner. Wir stehen Ihnen bei jedem Prozessschritt unterstützend zur Seite. Vom ersten Besuch vor Ort, bis zur finalen Abnahme. Mit der Standard-Support-

Vereinbarung erhalten Sie Zugang zu unserem Helpdesk und Unterstützung durch unseren Support. Unsere internationalen Tochtergesellschaften bieten Support in Ihrer Muttersprache

und in Ihrer lokalen Zeitzone. Alle Anfragen werden dokumentiert und so schnell wie möglich bearbeitet. Wir arbeiten rund um die Uhr an Lösungen für Sie.
