AXESS

AX500 Smart Gate NG Flap Glass

The elegant doorman

The **AX500 Smart Gate NG Flap Glass** is the ideal access control system for museums, leisure and tourist attractions. The elegant entry invites the visitor with glass doors. Equipped with the **Axess SMART SCANNER 600** tickets can be read within seconds. By holding the barcode or QR-code into the generous scanning area, the door gives way contactlessly. Motion sensors detect if

a person is approaching and trigger the opening mechanism after validation of the ticket. The doors are made of safety-glass and come in standard and ADA dimensions. The opening and closing speed is adjustable. The beautiful, elegant but robust glass doors come in an appealing design that is highly appreciated for stylish locations. The scanner is able to read barcode and QR-codes,

wristbands and RFID-tickets. In order to be flexible concerning the positioning of the gate, it can be mounted on the **Axess Mobile Pallet** as well. Equipped with a battery pack and WIFI, it can be positioned anywhere within the WIFI network. The battery charges the whole system with electricity and enables an average operation time of 10 hours under normal use.

Features

- › Motion sensors for contactless access
- › Adjustable opening speed of doors
- › Elegant doors made out of safety glass
- › Reading barcodes, QR-codes, smart cards, wristbands or RFID tags
