

The image shows a modern, white, vertical smart gate system with a red handle and a digital screen. It is positioned in front of a glass wall with large, orange and white text that reads "We customize solutions." and "AX500 Smart Gate NG". The gate is part of a mobile pallet system, as indicated by the text "Mobile Pallet" and "WIFI". The background is a blurred indoor setting with a wooden floor and other equipment.

# AX500 Smart Gate NG Mobile Pallet & WIFI

## The independent access solution

The combination of the **AX500 Smart Gate NG, Mobile Pallet** and **WIFI** is the perfect portable solution for stadia and arenas and offers the venue complete independence. The pallet is equipped with wheels to enable a quick change to the position of the gate. With two or more gates in a row a multilane can be created easily. **Axess WIFI** is the ad-

vanced module for complete wireless online operation of an **AX500 Smart Gate NG**. The powerful connected **Axess SMART SCANNER 600** as well as a long lasting battery are integrated in every Axess gate without the usual power cords or data lines. The **Axess TURNSTILE PANIC ASYMMETRIC** gives way with just one click on the

central dashboard. All turnstiles turn into emergency mode and are open to leave the venue. A 24V (lithium) battery with 40Ah loading capacity charges the whole system with electricity and enables an average duration of 10 hours under normal use.

### Features

- › Enables wireless online mode between gate and **Axess DATACENTER** (Cloud)
- › Operation without power cords or data lines
- › Temperature range -20°C to +50°C (-4°F to +122°F)
