

AXESS

# Smarter Solutions for EUROPEAN ROTORS

**EUROPEAN  
ROTORS**  
Germany

**The EUROPEAN ROTORS trade show brings together all aspects and players of the rotorcraft industry in Europe. The second edition of the event was marked with great success and managed holistically by Axess.**

**Smart access for the trade show**  
EUROPEAN ROTORS was held in Cologne at the beginning of November 2022. The premiere event was hosted in Friedrichshafen in 2021. In 2021, as well as in 2022, the access management

of the trade fair was handled by Axess. With a pleasing increase in the number of exhibitors as well as an enormous growth in visitors, the trade fair has already become the second largest VTOL event in the world.

the Axess rental stock for the duration of the event. The gates, which thanks to their integrated battery pack and WLAN connection can be moved easily, quickly, and flexibly to any desired location, had been positioned on site.

**AX500 Smart Gate NG - Mobile Pallet**

In November 2022, the entire ticketing and access of the event at the exhibition center of Cologne was done with Axess hardware and software. "As project manager for European Rotors Show I was a pleasure to work with Team Axess. The co-operation was smooth, professional and customer friendly from the beginning to the end and no request was too much for them. I can only recommend the company's services and I am looking forward to work with Axess on the next project" says Anna Tulis Ewald, Project Manager of EUROPEAN ROTORS.

## **Smart Gates with WIFI and battery pack**

The **AX500 Smart Gates NG - Mobile Pallet** were used to ensure smooth access. The devices were rented from

The flexible access system can be perfectly used for different types of events. The pallet is equipped with wheels to allow a quick change of position of the gate. In addition, the access can be configured as single- or multi-lane according to the customer's requirements, and it is completely wireless. The WIFI module provides wireless online operation of the gate with the powerful **Axess SMART SCANNER 600** control module. The long-life battery pack powers the gate and has an average power output of 10 hours with normal use.

## **Butterfly Badge**

The **AX500 Smart Gate NG - Mobile Pallet** can be extended with the **Axess BADGE BOX 600** according to the customer needs. With the ticket

already purchased, or if the guest has registered online in advance, the visitor badge can be printed directly at the entry gate. Butterfly badges were used for the EUROPEAN ROTORS. This type of badge allows printing on both sides with the visitor information and, thanks to the sturdy paper, a plastic case to protect the badge is not necessary.

#### Exhibitor & Visitor Ticketing Solutions

As in most branches, ticketing in the trade fair sector is mainly handled online. The **Axess VISITOR.TICKETSHOP** was used for ticket sales.

On site, trade visitors could purchase their tickets at the **Axess SMART POS** and register by themselves via the **Axess VISITOR.SELFREISTRATION**. For the exhibitors, as well, everything was focused on digitalization.

Via the **Axess EXHIBITOR.PLATFORM**, exhibitors can manage their exhibitor passes and voucher invitations and evaluate the status of these. In a dashboard, exhibitors always have an overview of all relevant information.
