

Axess PAY PER USE

Increasing revenue with electronic toll mode invoicing

Every skier on your slopes is an important ambassador of your resort. Being a member of the PAY PER USE program allows you to get more connected to your guests and increase profit by offering more services and special deals.

It is the clever service that allows the skier to pay only for the actual time he spends on the ski slopes participating in the system. Furthermore by saving on the purchase of the season ticket, other services or offers and on waiting times. He can use all lifts of the whole resort with one single ticket, ski how much and where he wants.

The system automatically charges on the credit card the price equivalent of the duration of the activity according to the age and to the time band. At any moment you can check the times, the report of your skiing guest, the costs borne and the skiing performance during the season.

Axess PAY PER USE

Benefits for you

- › Create membership programs and enroll your skiers and guest online, via the Axess webshop.
- › Self-Registration of the guest generates full payment information by subscribing
- › Allow your guests to ski in your resort and pay in electronic toll mode
- › Improve the positive ski day experience, this experience is very attractive for local guests
- › Smart cards allow your guests to ski without having to pass checkouts
- › Offer promotions and discounts to your members (like a discount every 5th ski days for example)
- › Earn money early in the season with subscription fees
- › Avoid crowd at the lift tickets shop
- › Automatically charge the guest on a regular basis (daily/weekly/monthly), or manually, based on his ski days
- › Charge the guest depending on the person type and depending on the resort he skied in
- › Change the price on a daily base, and adapt it to the local conditions (weather, closed areas...)
- › Branding customized to your website design
